

Analytics to provide insights into the commercial and fiscal health of the borrower

CHALLENGE

APPROACH

BENEFIT

IMPACT

RISK ASSESSMENT AND MONITORING SOLUTION

Creating a robust framework to proactively monitor credit health of small and medium sized borrowers

Equip business and credit users with Customer Surveillance capability across key quadrants for their credit relationships

Combine data from multiple internal and external sources

Use reports, dashboards and client portal framework to reflect Key Performance and Risk Indicators

Factor in harmonization and sanitization of data

Pro-active monitoring of early warning indicators

Single borrower view covering Operating and Financial Performance, and Account Conduct

Alerts based on pre-defined business rules and thresholds to enable prompt remedial actioning

Early warning for pro-active remedial measures.

Better management of Credit Losses

Reduction in credit losses

"The key was to be able to effectively combine the disparate data sources and present the KPI's in a single borrower view. The need for process innovation to digitize data not otherwise captured formally was another unique functionality we added to the solution"

ASHISH VORA,
